2514 EL Den Haag, Nederland

Vienna, 16 January 2024

noyb Case-No: **C093-05**

Complainant:

[REDACTED]  
[REDACTED]  
[REDACTED]

WeChat ID: [REDACTED]

Linked phone number: [REDACTED]

Represented under  
Article 80(1) GDPR by:

**noyb – European Center for Digital Rights**  
Goldschlagstraße 172/4/3/2, 1140 Vienna, Austria

Respondent:

**Tencent International Service Europe B.V.,**  
Buitenveldertselaan 1-5, 1082 VA  
Amsterdam, Netherlands

Regarding:

The transfer of personal data to the People's Republic of China and the resulting violation of Chapter V of the GDPR due to the lack of an adequate level of data protection in that country.

# COMPLAINT

## 1. REPRESENTATION

1. *noyb* – European Center for Digital Rights is a not-for-profit organisation active in the field of the protection of data subjects' rights and freedoms with its registered office in Goldschlagstraße 172/4/2, 1140 Vienna, Austria, registry number ZVR: 1354838270 (hereinafter: “*noyb*”) (**Annex 1**).
2. *noyb* is representing the Complainant under Article 80(1) GDPR (**Annex 2**).

## 2. FACTS PERTAINING TO THE CASE

### 2.1. Respondent (“Tencent”)

3. Tencent is a “*a world-leading internet and technology company that develops innovative products and services to improve the quality of life of people around the world*”, according to its website.<sup>1</sup> More specifically, Tencent provides users with access to (inter alia) WeChat, a social network application, enabling users to (inter alia) call, chat and video call (hereinafter: “*WeChat*”).<sup>2</sup>
4. Tencent International Service Europe (hereinafter: “*Respondent*” or “*Tencent*”) is part of the Weixin Group, which is one of the six groups of Tencent Holdings Limited (hereinafter: “*Tencent Group*”). Tencent Group acts via its subsidiaries, such as the Respondent, WeChat International Pte. Ltd. (Singapore), Shenzhen Tencent Computer Systems Company Limited (China), etcetera.<sup>3</sup>
5. Tencent (Europe) is established in the Netherlands, and is processing personal data in the context of this establishment (Article 3(1) GDPR).<sup>4</sup> Therefore, the GDPR is applicable.

### 2.2. Complainant

6. The Complainant is a user of WeChat [REDACTED]. To use WeChat, the Complainant had to create an account and provide personal data to do so. According to the Privacy Policy of WeChat, the WeChat collects and processes personal data, such as registration data (such as name Apple ID, mobile number, etcetera), location data (such as location data derived from your GPS, WiFi or IP address), log data (such as information on device attributes, information about your communication on WeChat and metadata), profile data (such as WeChat ID, name, gender and photo), contacts and friend lists, etcetera (**Annex 3**, under 3. and 4.).

---

<sup>1</sup> <https://www.tencent.com/en-us/about.html>

<sup>2</sup> <https://www.wechat.com/>

<sup>3</sup> <https://www.tencent.com/en-us/about.html>

<sup>4</sup> **Annex 3**, Summary and Section 1.

7. Since the Complainant's habitual residence is located within the EU/EEA, the Complainant's personal data are processed, in particular, by Tencent's place of its central administration in the EU: Tencent International Service Europe B.V. (the Respondent) (**Annex 3**, under 1.).
8. On [REDACTED] 2024, the Complainant tried to access his personal data, to verify whether her personal data was being transferred to China or any other third country by Tencent. For that purpose, the Privacy Policy (**Annex 3**, under 11.) directed him to the WeChat Data Subject Rights Request Form, which he filled out to file an access request (**Annex 4**).<sup>5</sup> The Complainant therefore ticked the box "Access":

---

*Annex 4. The access request the Complainant filed.*<sup>6</sup>

---

9. The Complainant furthermore added in the open field to the question "*Have you additional questions or requests about our data access policies? Please list them here:*"

---

*Annex 4. The access request the Complainant filed.*<sup>7</sup>

---

10. Even though the Complainant filed its request more than four months ago, to this date, the Respondent has not replied to the Complainant's request.

### 2.3. Tencent's Privacy Policy

11. The Respondent provides a Privacy Policy on its website.<sup>8</sup> When the Complainant sent the access request to the Respondent on [REDACTED] 2024 (**Annex 4**), the version of April 12<sup>th</sup> 2024 was applicable (**Annex 3**).
12. The Privacy Policy covers the processing activity regarding data related to the Platform the Complainant is using, as it: "*applies to you if you are a **WeChat user**, meaning that you have registered by linking a mobile number that uses an international dialing code other than +86 ("**non-Chinese Mainland mobile number**").*" (**Annex 3** Summary). Therefore, the Privacy Policy applies since the Complainant linked its' [REDACTED] phone number to his WeChat account [REDACTED].

<sup>6</sup> [https://www.wechat.com/en/privacy\\_policy.html](https://www.wechat.com/en/privacy_policy.html) (**Annex 3**) which linked to [https://help.wechat.com/cgi-bin/newreadtemplate?t=help\\_center/index\\_vue#/rights-request](https://help.wechat.com/cgi-bin/newreadtemplate?t=help_center/index_vue#/rights-request) (**Annex 4**).

<sup>7</sup> [https://www.wechat.com/en/privacy\\_policy.html](https://www.wechat.com/en/privacy_policy.html) (**Annex 3**) which linked to [https://help.wechat.com/cgi-bin/newreadtemplate?t=help\\_center/index\\_vue#/rights-request](https://help.wechat.com/cgi-bin/newreadtemplate?t=help_center/index_vue#/rights-request) (**Annex 4**).

<sup>8</sup> [https://www.wechat.com/en/privacy\\_policy.html](https://www.wechat.com/en/privacy_policy.html) (**Annex 3**).

13. The Section 6 of the Privacy Policy describes Tencent’s international data transfers. Tencent does not specify the exact destination of international data transfers. According to the Privacy Policy, data will be stored or processed in Singapore or Hong Kong Special Administrative Region (SAR). Nevertheless, in the same section, Tencent states:

*“Our engineering, technical, and other support teams are based in our offices around the world (including Singapore and the Netherlands) and may have incidental access to certain of your information, for example, in order to fix technical issues that you report.”* (Annex 3, Section 6)

In the Summary Section of the Privacy Policy is stated:

*“We also have support, engineering and other teams that support the provision of WeChat to you, located around the world (including Singapore and the Netherlands), who will have access to your information.”* (Annex 3, Summary)

Consequently, any personal data of the Complainant may be transferred to one of Tencent’s offices or data centers, including to Tencent’s Shenzhen’s headquarters in China<sup>9</sup> (Annex 3, Section 6).

14. That the Complainant’s personal data is being transferred to China, is acknowledged by the fact that the Section 5 of the Respondents’ Privacy Policy states: *“We share your Personal Information within our group of companies, and these related group companies may only use your Personal Information in accordance with this Privacy Policy.”* (Annex 3, Section 5).
15. Main corporate bodies responsible for data protection, such as the *“Personal Information Protection and Data Compliance Management Taskforce”*, as well as the Data Protection Officer all seem to be based in Shenzhen, China (Tencent’s headquarters) as well.<sup>10</sup> Hence, the personal data of the Complainant (and other EU/EEA users) has to be transferred to China to enable the abovementioned corporate bodies to fulfil their tasks properly, in particular to process data subject request and complaints.<sup>11</sup>
16. It is also very likely that service providers with whom personal data is shared to provide the service, are also (partially) established in China (Annex 3, Section 5). Unfortunately, Tencent does not provide a list of recipients and where they are established.
17. Furthermore, Tencent’s Privacy Policy describes that Tencent complies with *“government, public, regulatory, judicial and law enforcement bodies or authorities”* requests: *“There are circumstances in which we are legally required to disclose your information, including (i) to comply with a legal obligation or request, such as a*

---

<sup>9</sup> <https://www.tencent.com/en-us/about.html>

<sup>10</sup> Tencent Environmental, Social and Governance Report 2023, p. 47, <https://static.www.tencent.com/uploads/2024/05/29/045cba29b4153119f3cd17c406ac2433.pdf>

<sup>11</sup> Tencent Environmental, Social and Governance Report 2023, p. 48, <https://static.www.tencent.com/uploads/2024/05/29/045cba29b4153119f3cd17c406ac2433.pdf>

*court order, subpoena or other legal process.*” (**Annex 3**, Section 5). Since these “lawful requests” are not limited to EU-law, these also include “lawful requests” under Chinese (intelligence service) laws.

18. The Respondent states in its Privacy Policy in Section 6, that it transfers personal data outside the EEA, including China, on the basis of Standard Contractual Clauses of the European Commission (hereinafter: “SCCs”) (“*European Commission’s model contracts for the transfer of personal data*”) (**Annex 3**, Section 6). Given the lack of any adequacy decision regarding China, Tencent seems to rely on SCCs under Article 46 GDPR for all relevant data transfers to China.

## 2.4. Chinese government access to Tencent’s user data

19. Neither Tencent Europe, nor the Tencent Group provides any information regarding Chinese government requests made to them or access given by them upon such requests.
20. However, another Chinese company, i.e. Xiaomi Inc., confirmed that they receive many requests from various Chinese public authorities regarding user data.<sup>12</sup> Xiaomi’s Transparency Reports of 2020, 2021 and 2022 (**Annex 5**, **Annex 6** and **Annex 7**) show that the Xiaomi Group receives thousands of requests for user data from various Chinese government bodies, and these requests are almost always granted (**Annex 8**).
21. Neither Tencent Europe, nor the Tencent Group did publish similar transparency reports, however we note that, in particular, Chinese law grants the authorities with unrestricted powers regarding access to data processed by, inter alia, Chinese companies.<sup>13</sup> Thus, it is very likely that the Respondent, being a subsidiary of a Chinese company and part of the Tencent Group, also receives a very high number of requests by Chinese government bodies and has to give access to personal data in case of such requests, since the same laws apply to them.
22. This is confirmed by this information provided by the Tencent in their Privacy Policy (**Annex 3**, Section 5),<sup>14</sup> in a Tencent Report<sup>15</sup> and by Tencent’s “*Law*

---

<sup>12</sup> E.g. Xiaomi Transparency Report GOVERNMENT REQUESTS FOR USER INFORMATION January 1 – December 31, 2022, [link](#), p. 4-7 (**Annex 6**).

Dempsey (eds), *Bulk Collection: Systematic Government Access to Private-Sector Data* (Oxford: 2017); EDPS Government access to data in third countries, EDPS/2019/02-13, [link](#).

<sup>14</sup> “*There are circumstances in which we are legally required to disclose your information, including (i) to comply with a legal obligation or request, such as a court order, subpoena or other legal process.*” (**Annex 3**, Section 5).

<sup>15</sup> Environmental, Social and Governance Report 2023, p. 48 (<https://static.www.tencent.com/uploads/2024/05/29/045cba29b4153119f3cd17c406ac2433.pdf>): “*Tencent acts in accordance with applicable laws and follows the following general principles whenever we receive requests to disclose data from government agencies and regulators: We respond to valid, legal requests consistently and fairly across all jurisdictions where we offer our products and services, subject to applicable laws and regulations and our interpretation of potential differences between jurisdictions; [...]*”

*Enforcement Data Request Guidelines*”,<sup>16</sup> in which they describe they respond to requests in accordance with applicable laws and regulations (including Chinese laws).

## **2.5. Second complaint**

23. The Complainant is planning on filing a separate complaint regarding the violation of Article 12 and Article 15 GDPR by the Respondent. Because this Complaint and this second complaint handle different violations, they should therefore be examined and handled separately.

## **3. COMPETENT AUTHORITY**

24. This Complaint is being lodged with the Dutch Data Protection Authority (Autoriteit Persoonsgegevens, hereinafter: “AP”) because the Respondent, Tencent Europe, is located in Amsterdam, the Netherlands.

## **4. VIOLATIONS OF THE GDPR**

### **4.1. Violation of Chapter V GDPR**

25. As described in paragraph 2.3 of this Complaint, the Complainant’s personal data is being transferred to China by the Respondent according to their Privacy Policy (**Annex 3**).
26. According to Article 44 GDPR, any transfer of personal data to a third country is, in principle, forbidden. A transfer may take place only if the conditions laid down in Chapter V are complied with. As explained below, none of these conditions are met, and therefore, the transfer of personal data of the Complainant to China by the Respondent is unlawful because of the following:

#### ***4.1.1 No adequacy decision (Article 45 GDPR)***

27. The EU Commission has not decided that China ensures an adequate level of protection (cf. Article 45(1) GDPR). Therefore, Tencent cannot transfer personal data of the Complainant to China on the basis of an adequacy decision.
28. Because of this, according to its Privacy Policy, the Respondent transfers personal data on the basis of the EU Commission’s SCCs (Article 46(2)(c) GDPR): “*We rely on the European Commission's model contracts for the transfer of personal data to third countries.*” (**Annex 3**, Section 6).

---

<sup>16</sup> “We respond to Requests made by a Requesting Authority in accordance with these guidelines, subject always to applicable laws and regulations.”

[https://www.wechat.com/en/law\\_enforcement\\_data\\_request.html](https://www.wechat.com/en/law_enforcement_data_request.html)

29. This means the Respondent has to conduct a data transfer impact assessment (hereinafter: “TIA”), to verify whether Chinese laws or practices impinge on the effectiveness of the SCCs under Article 46 GDPR.<sup>17</sup>

#### ***4.1.2 Chinese law impinges the effectiveness of appropriate safeguards***

##### ***4.1.2.1 “Essentially equivalent level of data protection” requirement***

30. According to Article 44 GDPR, data transfers to countries outside of the EEA – such as China – are only allowed when “*the level of protection of natural persons guaranteed by this Regulation is not undermined.*”
31. The CJEU clarified that it is the European Commission’s task to evaluate the level of data protection in a third country in case of an adequacy decision under Article 45 GDPR.<sup>18</sup> Nevertheless, the controller who relies upon appropriate safeguards under Article 46 GDPR – such as SCCs – also needs to verify to what extent the third country law satisfies a data protection level equivalent to the EU level of data protection.<sup>19</sup>
32. According to the CJEU and Article 46(1) GDPR, for a third country’s level of data protection to be considered as essentially equivalent in relation to appropriate safeguards, a third country’s laws must (at least) under Article 7, 8 and 47 CFR:
- (a) Provide data subjects (the Complainant) with enforceable data protection rights;
  - (b) Provide data subjects (the Complainant) with effective legal remedies;
  - (c) Guarantee the limitation of access to personal data (of the complainant) by law enforcement and national security authorities.<sup>20</sup>

##### ***4.1.2.2 Violation of Article 7 and 8 CFR***

###### **(A) Commercial data transfers**

---

<sup>17</sup> Cf. EDPB Recommendations 2020/01, Section 2.3: “*Section 2.3 Step 3: Assess whether the Article 46 GDPR transfer tool you are relying on is effective in light of all circumstances of the transfer.*”

<sup>18</sup> CJEU C-363/14 (*Schrems I*), CJEU C-293/12 and C-594/12 - Digital Rights Ireland.

<sup>19</sup> CJEU C-363/14 (*Schrems I*), para. 73 and para 101-102. The CJEU clarified that the concept of essential equivalence is not about the exact copy of the EU data protection law, but it: “[...] *must be understood as requiring the third country in fact to ensure, by reason of its domestic law or its international commitments, a level of protection of fundamental rights and freedoms that is essentially equivalent to that guaranteed within the European Union by virtue of Directive 95/46 read in the light of the Charter.*”; Cf. EDPB Recommendations 2020/01, para. 32: “*You will need to look into the characteristics of each of your transfers and determine whether the domestic legal order and/or practices in force of the country to which data is transferred (or onward transferred) affect your transfers.*”

<sup>20</sup> CJEU C-311/18 (*Schrems II*), para 103-105; WP29 Adequacy Referential, WP254rev.01, Chapter 4 (endorsed by the EDPB: [link](#) , under 15.).

33. According to the Respondent, the basis of the transfer of personal data of the Complainant to China are SCCs (**Annex 3**, Section 6). We would like to note that, in principle, the SCCs only cover commercial data transfers, i.e. data transfers related to the purchases concluded via the Platform.
34. Because of their nature, the SCCs do not cover relations between the controller and third-country authorities. Therefore, the effectiveness of SCCs can be severely compromised by the third-country law.

(B) Access to personal data by law enforcement and national security authorities

35. Some commentators mention the close alignment of Chinese data protection law (in general) with the European or American data protection law.<sup>21</sup> In reality, however, the Cybersecurity Law (hereinafter: “CSL”),<sup>22</sup> the Personal Information Protection Law (hereinafter: “PIPL”),<sup>23</sup> the Chinese Civil Code,<sup>24</sup> and the Data Security Law (hereinafter: “DSL”)<sup>25</sup> differ substantially from European laws.<sup>26</sup>
36. First, Chinese data localisation laws make it obligatory to store data that was processed (“*collected and produced*” and “*collected and generated*”) in China within Chinese territory.<sup>27</sup> Therefore, all data controllers<sup>28</sup> running their business activity (partially) in China – like companies within the Tencent Group (in particular

<sup>21</sup> E. Pernot-Leplay, ‘China’s Approach on Data Privacy Law: A Third Way between the U.S. and the EU?’, *Penn State Journal of Law and International Affairs* 2020/8, p. 53–54, 81–82; R. Berti, ‘Data Protection Law: A Comparison of the Latest Legal Developments in China and European Union’, *European Journal of Privacy Law & Technologies* 2020/34, p. 37.

<sup>22</sup> Zhonghua Renmin Gongheguo Wanglup Anquan Fa (中华人民共和国网络安全法) [Cybersecurity Law of the People’s Republic of China] (issued by the Standing Committee of the National People’s Congress on 11 July 2016, came into force on 1 June 2017).

<sup>23</sup> Zhonghua Renmin Gongheguo Geren Xinxi Baohu Fa (中华人民共和国个人信息保护法) [Personal Information Protection Law of the People’s Republic of China] (issued by the Standing Committee of the National People’s Congress on 20 August 2021, came into force on 1 November 2021).

<sup>24</sup> Zhonghua Renmin Gongheguo Minfa Dian (中华人民共和国民法典) [Civil Code of the People’s Republic of China] (issued by the National People’s Congress on 28 May 2020, came into force on 1 January 2021);

<sup>25</sup> Zhonghua Renmin Gongheguo shuju Anquan Fa (中华人民共和国数据安全法) [Data Security Law of the People’s Republic of China] (issued by the Standing Committee of the National People’s Congress on 10 June 2021, came into force on 1 September 2021).

<sup>26</sup> D. Hanlin, ‘The System Position and Protection of Personal Information Right in General Provisions of the Civil Law’, *US-China Law Review* 2018/3, p. 153–154; B. Qu, C. Huo, ‘Privacy, National Security, and Internet Economy: An Explanation of China’s Personal Information Protection Legislation’, *Frontiers of Law in China* 2020/3, p. 364; E. Pernot-Leplay, ‘China’s Approach on Data Privacy Law: A Third Way between the U.S. and the EU?’, *Penn State Journal of Law and International Affairs* 2020/8, p. 53–54; Y. Shao, ‘Personal Information Protection: China’s Path Choice’, *US-China Law Review* 2021/18, p. 236–238.

<sup>27</sup> **Article 37 Cybersecurity law of the People’s Republic of China (CSL):** “*Personal information and important data collected and produced by critical information infrastructure operators during their operations within the territory of the People’s Republic of China shall be stored within China. If it is indeed necessary to provide such information and data to overseas parties due to business requirements, security assessment shall be conducted in accordance with the measures developed by the national cyberspace administration in conjunction with relevant departments of the State Council, unless it is otherwise prescribed by any law or administrative regulation.*” (emphasis added)

Tencent's headquarters in Shenzhen<sup>29</sup>) – fall under the duty to store data created in China locally.<sup>30</sup> Because of this, practically any transfer of personal data from Chinese territory abroad (to the EU/EEA) requires prior authorization under the Cyberspace Administration of China Data Transfer Guidelines.<sup>31</sup>

37. Legal literature indicates the Cyberspace Administration of China (hereinafter: “CAC”) (also known as the State Internet Information Department) has discretionary power over every data transfer authorisation decision.<sup>32</sup> As a result, data subjects’ access requests and data portability rights become illusory because these rights are subject to “discretionary approval”.
38. Second, there is a very high risk that Chinese authorities will request and obtain (unlimited) access to personal data processed by Chinese companies. Chinese data protection laws do not limit the access by these authorities in any way. In fact, it is even unclear whether state authorities – including intelligence services – are

[关键信息基础设施的运营者在中华人民共和国 境内运营中收集和产生的个人信息和重要数据应当在境内存储。因业务需要，确需向境外提供的，应当按照国家网信部门会同国务院有关部门制定的办法进行安全评估；法律、行政法规另有规定的，依照其 规定。]

**Article 40 Personal Information Protection Law of the People's Republic of China (PIPL):** “Critical information infrastructure operators and the personal information processors that process the personal information reaching the threshold specified by the national cyberspace administration in terms of quantity shall store domestically the personal information collected and generated within the territory of the People's Republic of China. Where it is truly necessary to provide the information to an overseas recipient, the security assessment organized by the national cyberspace administration shall be passed. Where laws, administrative regulations, or provisions issued by the national cyberspace administration provide that security assessment is not required, such provisions shall prevail.” (emphasis added)

[关键信息基础设施运营者和处理个人信息达到国家 网信部门规定数量的个人信息处理者，应当将在中华人民共和国境内 收集和产生的个人信息存储在境内。确需向境外提供的，应当通过国 家网信部门组织的安全评估；法律、行政法规和国家网信部门规定可 以不进行安全评估的，从其规定]

<sup>28</sup> That is the conclusion that may be drawn from **Article 31 CSL**: “The state shall, based on the rules for graded protection of cybersecurity, focus on protecting the critical information infrastructure in important industries and fields such as public communications and information services, energy, transport, water conservancy, finance, public services and e-government affairs and the critical information infrastructure that will result in serious damage to state security, the national economy and the people's livelihood and public interest if it is destroyed, loses functions or encounters data leakage. The specific scope of critical information infrastructure and security protection measures shall be developed by the State Council. The state shall encourage network operators other than those of critical information infrastructure to voluntarily participate in the critical information infrastructure protection system.” (emphasis added)

[国家对公共通信和信息服务、能源、交通、水 利、金融、公共服务、电子政务等重要行业和领域，以及其他一旦遭 到破坏、丧失功能或者数据泄露，可能严重危害国家安全、国计民 生、公共利益的关键信息基础设施，在网络安全等级保护制度的基 础上，实行重点保护。关键信息基础设施的具体范围和安全保护办 法由 国务院制定。国家鼓励关键信息基础设施以外的网络运营者自愿参与关键信息基 础设施保护体系]。

covered by the definition of data controller in the PIPL and therefore if they have to comply with the PIPL.<sup>33</sup> Even if they do fall within the scope of the PIPL, it is unlikely, according to legal scholars, that the Chinese authorities would in practice comply with the data protection principles and other obligations of data controllers.<sup>34</sup>

39. Chinese laws, such as the National Security Law (hereinafter: “NSL”),<sup>35</sup> and the National Intelligence Law (hereinafter: “NIL”)<sup>36</sup> but also the DSL,<sup>37</sup> are treated as a general legal basis for Chinese authorities’ to obtain access to any personal data.<sup>38</sup> The general and vague nature of the provisions of the DSL, the NSL and the NIL prove that Chinese authorities can obtain unrestricted and unlimited access to personal data without providing any safeguards for the data subjects. For example:

(a) Article 35 DSL: *“As needed for maintaining national security or investigating crimes, a public security authority or national security authority shall legally pull data in accordance with relevant provisions issued by the state and by strictly following approval procedures, and the relevant organizations and individuals shall provide cooperation.”*<sup>39</sup> It should be noted that Article 35 DSL uses an unspecified term of “pulling

data”, which suggests that the authorities can access all the (personal) data available to a data controller, including personal data that is being processed outside of China.<sup>40</sup> (emphasis added)

(b) Article 11 NSL: “*All citizens of the People's Republic of China, state authorities, armed forces, political parties, people's groups, enterprises, public institutions, and other social organizations shall have the responsibility and obligation to maintain national security*”.<sup>41</sup> (emphasis added)

40. As a result, the processing by Chinese national law enforcement and/or national security authorities is not based on clear, precise and accessible rules, necessity and proportionality with regard to legitimate interests pursued are not demonstrated, the processing is not subject to independent supervision and there are no effective remedies available to the Complainant (or other EU data subjects).<sup>42</sup>

41. The Transparency Reports of Xiaomi (**Annex 5; Annex 6; Annex 7 and Annex 8**) also confirm the very high risk of Chinese authorities requesting and obtaining (unlimited) access to personal data in practice (cf. Section 2.4 of this Complaint). These Transparency Reports of Xiaomi show that:

(a) Chinese authorities request access to personal data on a very large scale, while in the same years Xiaomi only received few requests to provide personal data of Xiaomi users to EU/EEA authorities.

(b) Xiaomi almost always complies (or has to comply) with these Chinese authorities' requests.

42. Although Tencent Europe and/or the Tencent Group have not published any reports on Chinese authorities' data requests, Xiaomi reports provide solid evidence of such requests with respect to personal data processed by China-based companies in general.

#### 4.1.2.3 Violation of Article 47 CFR

43. It is almost impossible for a foreign data subject to exercise his/her rights under the PIPL<sup>43</sup> or the Chinese Civil Code.<sup>44</sup>
44. First, there is no dedicated, independent and competent data protection authority in China.<sup>45</sup> The CAC plays an important role in Chinese data protection law,<sup>46</sup> although for some provisions it is very difficult to indicate which authority is actually responsible for a particular task.<sup>47</sup> It is worth emphasising that the CAC is closely related to the State Council,<sup>48</sup> and as such may pursue political goals rather than effective independent supervision of data processing activities.
45. Second, an overall assessment of the Chinese judicial system, leads to the conclusion that the judicial control over data processing activities in China is very limited. The World Justice Project Rule of Law Index ranked Chinese courts on the 139<sup>th</sup> position (out of 142 countries) within the category of fundamental rights protection<sup>49</sup> and the 132<sup>nd</sup> position in category of restraints imposed by the courts on government powers.<sup>50</sup> When it comes to data protection, Chinese courts are not free from political pressure. As a result, the current political needs may prevail over the rights and freedoms of the data subjects.<sup>51</sup> This impossibility extends to

- obtaining effective administrative or judicial redress or claiming compensation as a data subject under the PIPL or the Chinese Civil Code.<sup>52</sup>
46. Third, when Chinese law enforcement or national security authorities request access to personal data, these Chinese authorities follow the “black box” route,<sup>53</sup> making it impossible for a data subject, to understand how exactly such requests have been or will be granted.<sup>54</sup> This makes it impossible to exercise any data protection rights in regard.
  47. Fourth, the scope and application of Chinese data protection laws are unclear. Chinese data protection provide rights to data subjects, but it is unclear whether and to what extent these rights can be exercised in practice. There are no provisions explaining the relationship between the CSL, the PIPL, the Chinese Civil Code and the DSL. As a result, all of them potentially apply and only a factual, case-by-case assessment should determine which law covers a particular data processing.<sup>55</sup> However, this leads to a situation where data controllers do not specify which law or laws apply or applies to the data processing or do so without any explanation. Therefore, it is also unclear whether and to what extent, data subjects can exercise and/or enforce their rights.<sup>56</sup>

#### **4.1.3 Conclusion: Tencent violates Chapter V GDPR**

48. It is then a foregone conclusion that any assessment of Chinese law, in particular the assessment that needs to be performed by the Respondent transferring personal data to China on the basis of appropriate safeguards (SCCs) under Article

46 GDPR, should result in avoiding, suspending and/or terminating the data transfers to China to avoid compromising the level of data protection of the personal data.<sup>57</sup>

49. Article 44 GDPR requires Tencent not to transfer the Complainant's personal data to China, unless it provides the Complainant with one of the appropriate safeguards under Article 46 GDPR, such as SCCs, supplemented by necessary, additional safeguards.<sup>58</sup> However, the Complainant is not aware of any supplemental measures taken by the Respondent, nor of any supplemental measures that could overcome the problematic legislation and the non-equivalent level of data protection.<sup>59</sup>

## 5. APPLICATIONS

50. As a consequence, and given that the transfer of the Complainant's personal data to China and the processing of the Complainant's personal data in China **is ongoing**, we request that the AP takes (among others) the following urgent actions:

- *First*, fully investigate the matter under Article 58(1) GDPR.
- *Second*, **immediately order the suspension of data flows to China** under Article 58(2)(j) GDPR regarding the transfer of the Complainant's and other European users' data to China as it does not provide essentially equivalent level of data protection under Article 44 and 46 GDPR.
- *Third*, bring its **data processing activities into compliance with Chapter V of the GDPR** under Article 58(2)(d) GDPR.
- *Fourth*, issue an **effective, proportionate and dissuasive fine** under Article 58(2)(i) and Article 83 GDPR.

### 5.1. Duty to act

51. The CJEU has repeatedly held that supervisory authorities have a positive duty to act if they are made aware of a GDPR violation. In C-311/18 *Schrems II* the CJEU held at paragraph 111:

*“In order to handle complaints lodged, Article 58(1) of the GDPR confers extensive investigative powers on each supervisory authority. If a supervisory authority takes the view, following an investigation, that a data subject whose personal data have been*

---

<sup>57</sup> Cf. EDPB Recommendations 01/2020, para 72.

<sup>58</sup> CJEU C-311/18 (*Schrems II*), para. 101-104.

<sup>59</sup> EDPB Recommendations 01/2020, para 75.

*transferred to a third country is not afforded an adequate level of protection in that country, it is required, under EU law, to take appropriate action in order to remedy any findings of inadequacy, irrespective of the reason for, or nature of, that inadequacy. To that effect, Article 58(2) of that regulation lists the various corrective powers which the supervisory authority may adopt.”*

52. In the Joint Cases C-26/22 and C-64/22 *SCHUFA* the CJEU has further highlighted at paragraph 57:

*“In order to handle complaints lodged, Article 58(1) of the GDPR confers extensive investigative powers on each supervisory authority. Where, following its investigation, such an authority finds an infringement of the provisions of that regulation, it is required to react appropriately in order to remedy the shortcoming found. To that end, Article 58(2) of that regulation lists the various corrective measures that the supervisory authority may adopt.”*

53. In C-768/21 *Land Hessen*, the AG has further issued an opinion saying at paragraph 82:

*“[...] that the supervisory authority has an obligation to act when it finds a personal data breach in the course of investigating a complaint. In particular, it is required to define the most appropriate corrective measure(s) to remedy the infringement and ensure that the data subject’s rights are respected. [...]”*

54. An equal result can be derived from the general duty of public authorities to uphold fundamental rights - like the right to data protection in Article 8 of the Charter. There is consequently no question that the AP has a duty to act in this case.

## **5.2. Investigation under Article 58(1) GDPR**

55. Given that some of the details of the processing of the Complainant’s personal data by the Respondent are unclear, we hereby request a full investigation of the AP using all powers under Article 58(1) GDPR, which should include at least the following steps:

- Clarification of the specific destination(s) of the Complainant’s personal data transferred internationally (globally).
- Clarification of the exact legal basis for the transfer of the Complainant’s personal data from the EEA to third countries, in particular to China.
- Clarification of the exact relationship between Tencent Europe and the Tencent Group, (and therefore the roles of the parties), in particular with regard to the processing of the Complainant’s personal data by the Tencent Group.

- Obtaining the “Transfer Impact Assessment”, or any documents or communications relating thereto, that the Respondent should have conducted pursuant to Article 46(1) GDPR, including any supplementary measures taken by the Respondent.
- Obtaining the record of processing activities under Article 30 GDPR.

### **5.3. Corrective powers under Article 58(2)(d)(j) GDPR**

56. Even before any investigation may have come to a final conclusion, we urge the AP to already take imminent, preliminary steps to ensure that the Respondent does not pursue the processing operations any further, including but not limited to:

- (a) Order a suspension of transfer of personal data of Complainant and other European WeChat services’ users to China, under Article 58(2)(j) GDPR;
- (b) Order the Respondent to bring the processing into compliance with Chapter V of the GDPR under Article 58(2)(d) GDPR;

57. Additionally, the Complainant also requests the AP to declare:

- (a) That SCCs are not an appropriate basis for the Respondent to transfer the Complainant’s personal data to China;
- (b) That the transfers of the Complainant’s personal data to third countries by the Respondent are unlawful.

### **5.4. Fine under Article 58(2)(i) and Article 83 GDPR**

58. It is our view that that the Respondent has breached (at least) Articles 44; 45(1) and 46(1) GDPR in a manner that amounts to a clear and intentional breach of the law – particularly in the light of the long list of previous CJEU decisions, EDPB recommendations and decisions by national data protection authorities.
59. Therefore, we suggest that the AP to impose a fine on the Respondent in accordance with Article 58(2)(i) GDPR. We note that Article 83(1) GDPR requires the AP to impose fines that are “*effective, proportionate and dissuasive*”.

## 6. CONTACT

60. Communications between *noyb* and the AP in the course of this procedure can be done by email at [REDACTED] with reference to the **Case-No C093-05** or [REDACTED].
